Website : It is the connection of interlinked web pages.

DNS [Domain Name System]

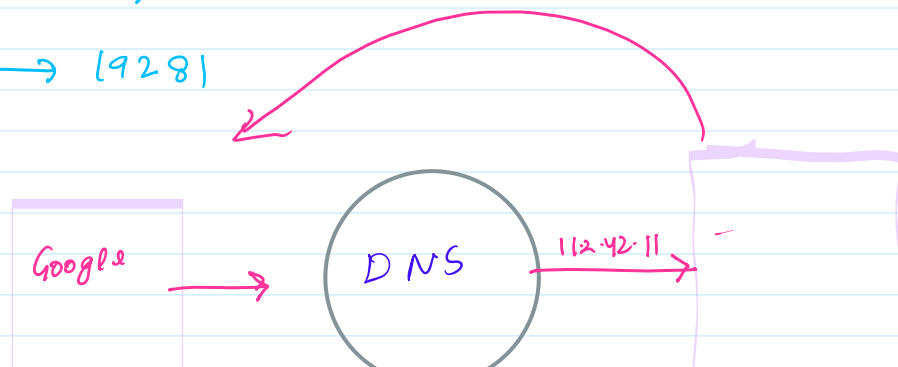

House name
Zach House → 152
Azaan House → 483
Aslim → (928)

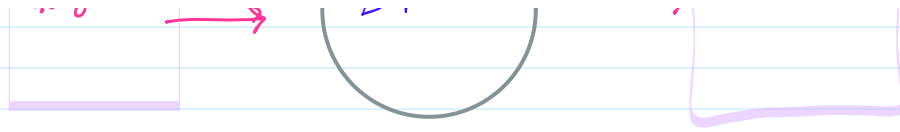

Website: IP Address

Google → 142.58.167.2

Youtube → 214.58.172.2

Netflix → 412.77.66.21

What is the Web Development ?

Google

YouTube

amazon

Process of building the website so that people can use on the internet

①

HTML (STRUCTURE)
Hyper Text Markup Language

②

CSS (STYLING)
Cascading Style sheets

③

JS (FUNCTIONALITY)
Javascript

1. HTML

- Bricks
- Cement /
- Roof
- Windows
- Gate

Basic building block of a house

HTML is like the basic structure/skeleton of every website.

Q. Can we create a website without using HTML ?

1. YES
2. NO ✓

2. CSS

→ Color / paint
→ Scenery
→ flowers
→ Wall decoration

➤ CSS is used to give color / appearance to a website

3. JavaScript (JS)

➤ It gives functionality/interactivity.

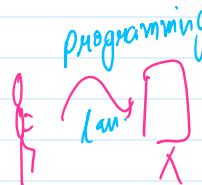

Imagine a robot.

Skeleton ✓

Body ✓

But it cannot move.

→ Inactive

Now add a brain. (JavaScript)

Now it can

Walk

Talk

Dance

Similarly

JavaScript

makes websites interactive.

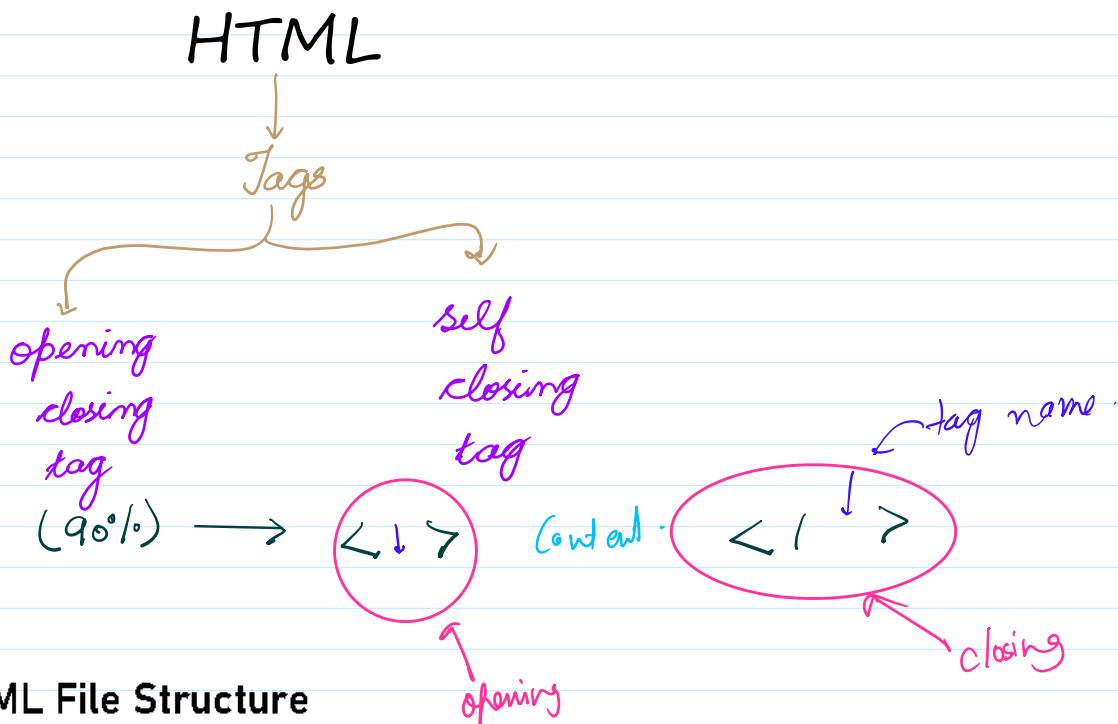

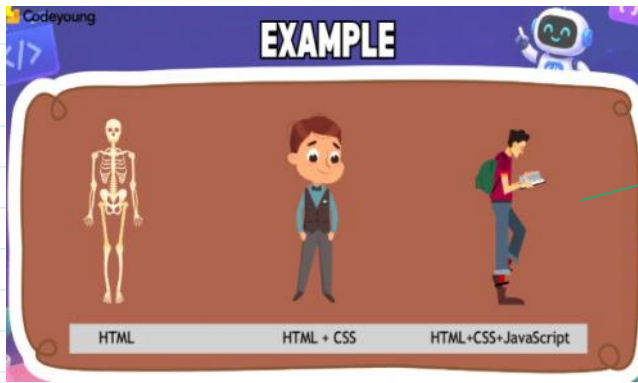

→ Active

Examples

Click button

Dark Mode

Technology	Human Body	House	Website
HTML	Skeleton	Bricks	Structure
CSS	Clothes	Paint	Design
JavaScript	Brain	Electricity	Actions

HTML File Structure

```

1 <!doctype html> → telling browser the latest version of HTML → HTML 5
2 <html lang="en"> → starting.
3 <body> → visibility
4 <h1>Azaan</h1>
5 <p>Python & Web Development mentor</p>
6 </body>
7 </html>
  
```
